

JA-122PW JA-162PW

Dual PIR and MW motion detector

It is used to detect the movement of people in the interior of buildings. A high immunity to false alarms is reached thanks to the combination of PIR and microwave (MW) detection. When movement is detected, the MW part is activated and confirms the previous PIR activation.

Available in white, gray (-GR) and anthracite (-AN).

TECHNICAL SPECIFICATION

	JA-122PW	JA-162PW
Power supply	from control panel	2x CR123A 3.0 V
Idle current consumption	5 mA	65 µA
Max. current consumption	16 mA	50 mA
Compatibility	JA-102K/R, JA-103K/R, JA-107K/R	
Mounting height	2.2 - 2.5 m above the floor level	
PIR detection angle / range	90° / 12 m	
MW detection angle / range	80° / 12 m	
Environment	indoor general	
Operating temperature	-10 °C to +40 °C	
Dimensions	65 x 150 x 40 mm	
Weight	120 g
